Description

This 2026 MINI Cooper C Classic represents a modern example of this iconic model, having been maintained by only one owner since its registration. It is powered by a 1.5L petrol engine that meets Euro 6 emission standards, ensuring it remains compliant with current environmental regulations. As a Classic trim variant, this vehicle combines the traditional MINI design language with contemporary engineering, offering a reliable and well-cared-for option for those seeking a recent model. The driving experience is defined by responsive performance, with the car capable of accelerating from 0-62mph in 8.0 seconds. This capability provides a spirited feel on the road that distinguishes it from many other vehicles in its class. Comfort is further enhanced by the inclusion of a heated steering wheel, a practical feature that adds a touch of convenience during colder weather. These elements work together to create a balanced driving experience that prioritises both efficiency and driver comfort.
