Description

This 2026 MINI Cooper C Classic is a well-maintained vehicle that has had only one owner since its registration. As a modern example of this iconic model, it is powered by a 1.5L petrol engine that meets Euro 6 emission standards, ensuring it remains compliant with current environmental regulations. The Classic trim level offers a refined specification, combining the traditional MINI aesthetic with the reliability expected of a recent model year. The driving experience is defined by responsive performance, with the car capable of accelerating from 0 to 62mph in 8.0 seconds. This capability provides a lively feel on the road, making it a practical choice for those who value agility and efficiency. Inside, the vehicle includes a heated steering wheel, a feature designed to provide added comfort during colder weather. These combined attributes make this MINI a balanced option for drivers seeking a blend of performance and everyday convenience.
