### Description

This 2023 MINI Electric Hatch Cooper SE Level 3 is a standout example, having been cherished by just one owner from new and showing remarkably low mileage of only 12407 miles. As a Level 3 trim, this electric MINI boasts a 33 kWh battery offering a maximum range of 142 miles when new. For your convenience, a full charge at home using a 7kW charger takes approximately 5 hours and 15 minutes, while rapid charging on the go can take you from empty to 80% in just 36 minutes at a public charging station. Adding to its appeal, this particular model features a desirable Panoramic Glass Sunroof, which includes an opening function for an even more open driving experience. Experience the spirited performance of this MINI Electric Hatch, with its impressive 0 to 62mph acceleration achieved in a swift 7.3 seconds. This quick acceleration demonstrates its capability and responsiveness, setting it apart from many other electric vehicles in its class. The combination of its low mileage, single owner provenance, and the added luxury of the panoramic sunroof makes this 2023 Cooper SE Level 3 a compelling choice for those seeking an engaging and stylish electric driving experience.
